Dear Mr. Roscioli,

After evaluation of the documentation submitted and with the recommendation of our technical reviewer the WV Office of Miners' Health Safety and Training approves the modification of ChemBio Shelter, Inc. models currently approved to utilize excess compressed breathable air in the structural inflation circuit to supplement purging air.

Models so built shall be identified by the inclusion of "XP" at the end of their serial number. Such serial number shall be easily observed by those doing inspections.

This modification does not change the requirement that all WV approved emergency shelters must be made complaint with MSHA part 7 by December 31, 2013.

ChemBio Shelter, Inc. shall, upon request, provide this office with verification of valid orders, delivery dates and status of deliveries as required for this office to enforce §56-4-8 and related orders.

Any changes required or enhancements to the approved design affecting the ability to meet any provision of §56-4-8 shall require approval of this office prior to any affected ChemBio Shelter, Inc. approved units being placed in operation.

Sincerely,

A handwritten signature in cursive script that reads "Eugene White".

Eugene White, Director
