August 3, 2010

Mr. Jack Henry  
Trinity Resources  
PO Box 800  
737 Eleanor Industrial Park  
Eleanor, West Virginia 25070

Mr. Henry:

After the evaluation of the documentation submitted May 25, 2010, the supplemental information of July 16, 2010, and with the recommendation of our technical reviewer, the WV Office of Miner's Health Safety and Training approves Trinity Resources Guardian Angel® safe house. This approval is for use in meeting the Emergency Shelters/Chambers requirements, outlined in WV Rule Governing Protective Clothing and Equipment, CSR56-4-8. This approval is contingent on your meeting the conditions noted below.

The Trinity Resources Guardian Angel® safe house is conditionally approved for a maximum of ten (10) miners when utilized in underground mines, and built as well as provisioned as per the application. Additionally the unit must provide a minimum of 96 hours life support.

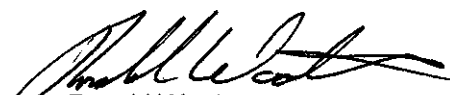

When the following are submitted by Trinity Resources, and approved by this office an unconditional approval shall be issued. In the mean time operators may include the Guardian Angel® safe house in shelter plans so long as the conditions below are resolved. Resolution(s) must occur prior to the installation date in the plan approved by the Regional Inspector at Large. Conditions are:

- Computational modeling of the Guardian Angel® safe house, which demonstrates compliance with the pressure requirements on all exterior surfaces.
- Finalization of the operations manual.

Trinity Resources shall, upon request, provide this office with verification of valid orders, delivery dates, and status of delivery as required for this office to enforce §56-4-8.

Any changes required or enhancements to the approved design, affecting the ability to meet any provision of §56-4-8, shall require approval of this office prior to any affected Trinity Resources Guardian Angel® safe house being placed into operation.

Sincerely,

  
Ronald Wooten  
Director
